

12 November 1974

MEMORANDUM FOR: Wheaton Byers
Executive Secretary, PFIAB

1. I think we're getting closer to what Admiral Anderson's friends described as the four phases of the Portuguese CP's program. This pamphlet was republished in May of this year (first edition published underground in 1965) and has just been translated. It has parallels with Cunhal's book, but is organized into four explicit phases (corresponding to roman numerals).

2. I have asked for more copies of this in case you want them. Meanwhile, OCI analysts are at work on a feature article on this which should appear shortly in the NID.
